

On-Demand Tabletop Creaser

FASTBIND C400™

Versatile applications:

- Photos and pictures
- Soft covers and folders
- Cards
- Menus

C400™ Manual Creaser

Max creasing width 400 mm / 15.75"

Creases soft covers, photobook pictures, cards, menus

Flexible creasing machine

Fastbind's C400 manual creasing machine is optimized to work in conjunction with perfect binding machines. The C400 makes the crease using a precision creasing bar and works with almost any paper/card up to 400 g/m² (or 220 lb index stock).

Special step-shape guides enable you to make up to 4 creases without re-adjusting the machine. The C400's versatility and consistent pressure guarantee a sharp regular crease in card, paper, PVC coated cardboard, and numerous other materials.

Two alignment guides

Fastbind's C400 is developed specially to crease book covers and cards for Print On Demand environment. With two alignment guides, you can make two different set-ups for the dimensions you want to use. (For example to fold A4 size sheet into a three-sided pattern, or to make four creases for a book cover).

Adjustable creasing power

Although manually operated, you can adjust the C400 to consistently give a harder or softer crease using the adjusters located under the creasing bar.

Specifications
